

Security Awareness Simulation — Report

Generated: 2026-08-09 10:48 UTC

This report summarizes a classroom phishing-awareness exercise. All captured credentials are from simulated training runs — passwords are stored as Bcrypt hashes.

Campaign Metrics

Campaign ID	Name	Targets	Sent	Opened	Clicked	Submitted	Click Rate
demo-campaign	Q3 Classroom Awareness Exercise	6	6	5	6	6	100%
2	test6	1	1	0	0	0	0%

Captured Credentials (Hashed)

Entries below show simulated captured credentials. Passwords are Bcrypt-hashed.

Key Takeaways for Students

- Look closely at the URL bar before entering credentials anywhere.
- Urgency and fear-based language is a classic social-engineering trigger.
- Legitimate services rarely ask you to 're-verify' your account via an emailed link.
- Report suspicious messages to IT/security instead of clicking through.
